

Dualfix

The next generation of track spacer

Description

An economic spacer for supporting mesh or bottom reinforcement in suspended slabs

Advantages

- Injection moulded which means it is stronger and less brittle than extruded products
- PVC free
- Manufactured from recycled plastics
- Can be separated by hand to form 2 x 1 metre lengths
- Each piece is stamped with its size
- Profile allows improved flow of concrete

Classification

Classified under BS7973 as a 'Normal' type line spacer

Performance table

All categories refer to BS7973

Requirement	Description	Result
6.2	min 25% voids	pass
7.3	± 2mm tolerance	pass
7.72	Breadth/height ratio	pass
9	max deflection of 1mm under 0.5kn test load	pass
11	marking of packs	pass
